E-PAK FEED-THRU PACKER ESP2355

Adding Value to Your ESP Completion

The E-Pak Packer has been specifically designed to protect the investment in your wellbore. Protection of your up-hole casing is critical to the longevity of your well, even when running an ESP in tight casing.

The E-pak combines best-in-class anchoring, sealing, and feed-thru technologies to give you the capability to protect your casing while maintaining a fully open tubing ID that allows standard well control techniques to be applied, when necessary.

Advantages

- ID fully open to tubing drift
- Hydraulic set (no pipe manipulation)
- Straight pull release
- 4 feed-thru bypasses
- Cost-effective redress

Specifications

Casing Size:	5 1/2" 20-23 lbs/ft
Top Connection:	2 3/8" API EUE 8rd Box
Bottom Connection:	2 3/8" API EUE 8rd Box
Tensile Rating:	70,000 lbs
Shear Release (Straight Pull):	30,000 lbs
Pressure Rating (above):	5,000 psi
Temperature Rating:	310°F
Max OD:	4.500" (4.645" for 15.5-17#)
Tubing ID:	1.930"
Feed-Thru ID:	1/2" (4 places)
Length:	45.5" (without pup joints)
Setting Pressure:	3,000 psi
